

BRADLEY DEMOLITION

Vibration Policy

The Company uses work equipment that can expose employees to potentially harmful levels of vibration. The following tools are examples of such equipment:

- Cut off saws, reciprocating saws, heavy duty breakers - HAV
- Crushers, skid steers – WBV

The Company takes its duties to prevent its employees suffering from the effects of Hand Arm Vibration (HAV) and Whole Body Vibration (WBV) very seriously. When such work is required all employees will be fully trained in the operation of such equipment and all work will be carried out in conjunction with the Specific Risk Assessment and Safe System of Work for that specific task. All vibration calculations will be carried out using [BS: 5228-2: 2009](#).

The persons responsible for this section of the policy are the Managing Group.
